The Emirates Towers
Dubai - UAE

Thanks to its technical and safety features, ALP System pre-insulated ductwork can be installed in any heating, ventilation and air conditioning systems.

ALP System. Solutions that originate from You

A very “fluid” history.

Air conduction could seem easy. The creation of a system that allows it without waste, limiting any installation expenses, minimizing any dispersions in the respect of the environment and according to safety regulations requires experience. Any ductwork can convey a fluid, but only a perfect system can do it in an efficient way. ALP mission is the optimization of air conduction and its significant national and international references grant that ALP can do it well.

Air in its best “form”.

The weight and the features of the fluid allow the using of very light structures that must have however perfect permeability and insulation properties. It is for this reason that ALP System is born. Thanks to the use of sandwich panels constituted by a rigid polyurethane foam board faced by aluminium foils and complying with the requirements of the European Standard EN-13403, ALP System boasts both superior mechanical features and an extraordinary installation flexibility. ALP System offers a so wide standard production range as to satisfy most of the requirements in HVAC field. Moreover ALP can meet with any Customer's needs by providing “Custom Made” products.

We work with the air holding our feet on the ground.

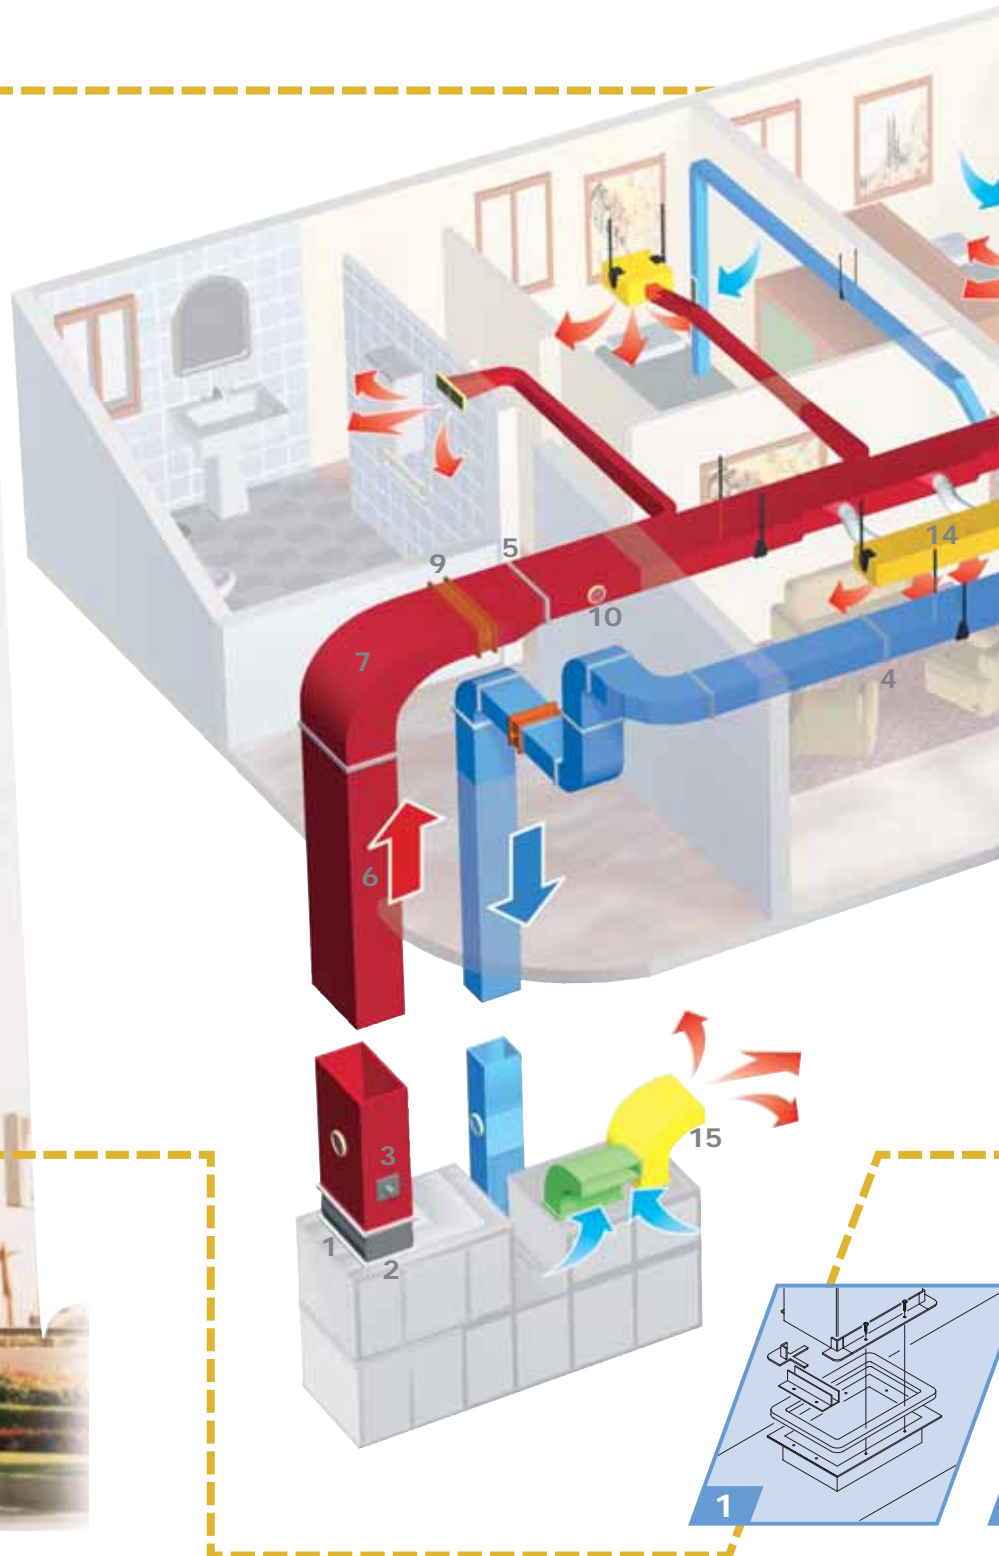

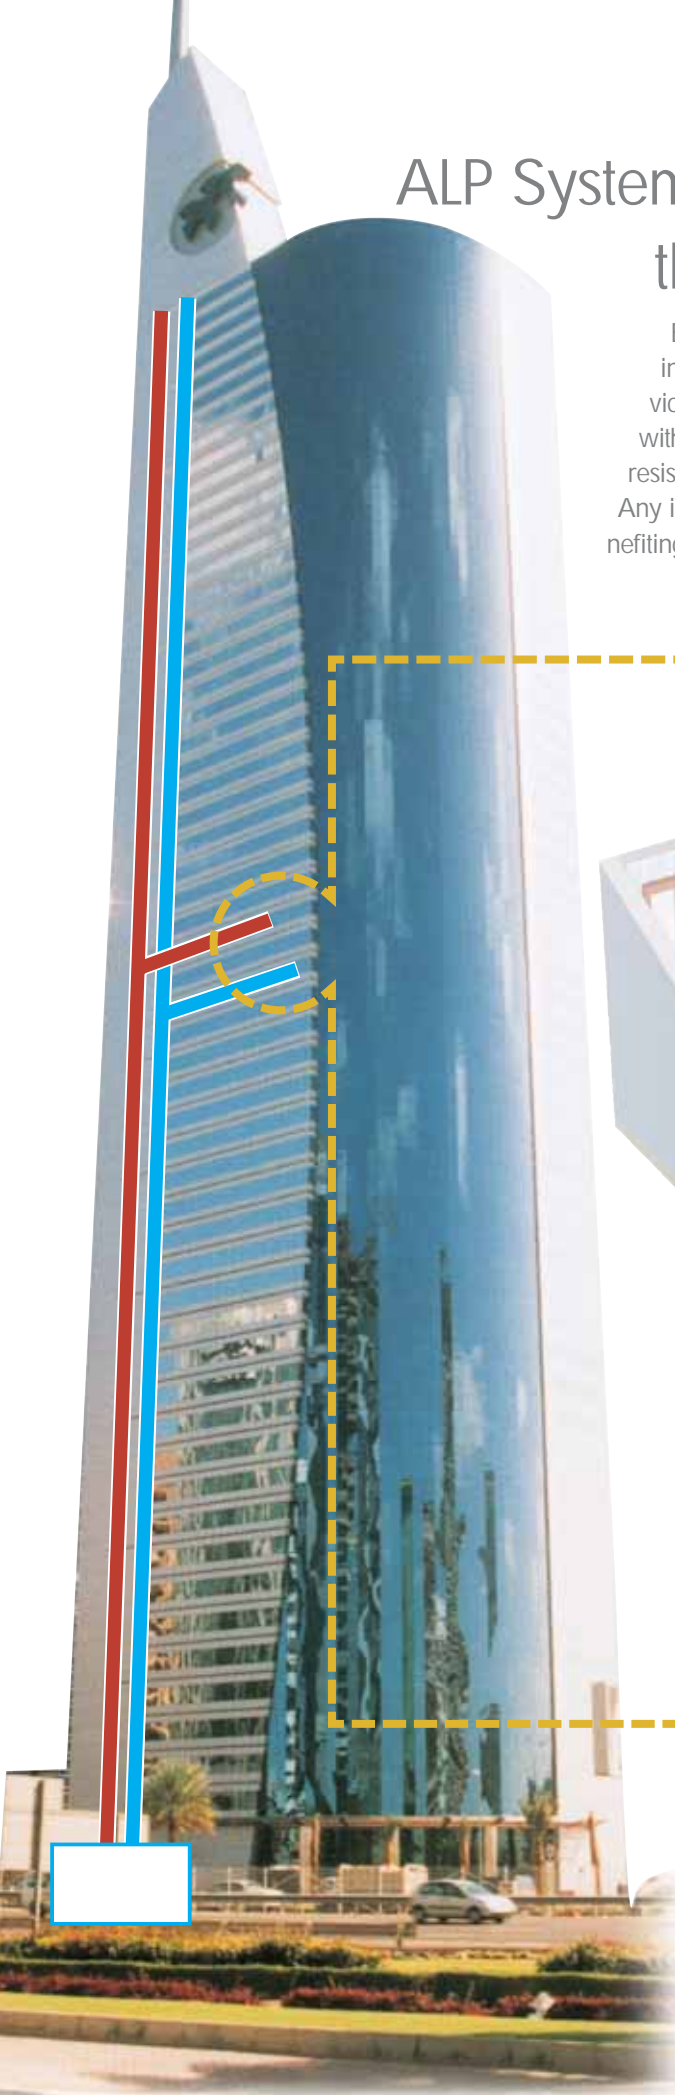

In addition to the exclusive thermo-insulating panels, ALP System includes a wide range of accessories and consumption materials that allow to assemble any kind of ductwork, using either simple manual tools or machineries. All production phases, from the selection of the raw materials up to the checking of the final product, are executed in regimen of quality and environmental protection, according to the ISO 9001 and ISO 14001 standards. In order to allow its Customers to get the best from ALP System and to fabricate high-performing ductwork, ALP organises Training Courses in Italy and abroad. So today air conduction rests on solid bases.

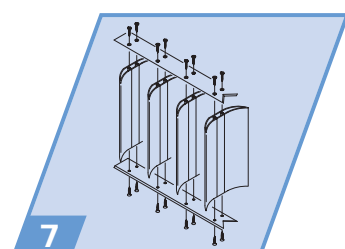

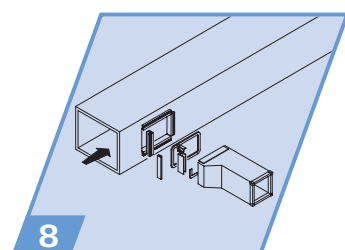

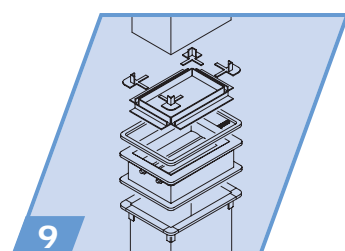

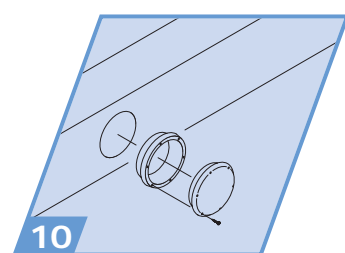

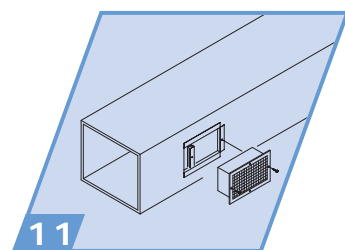

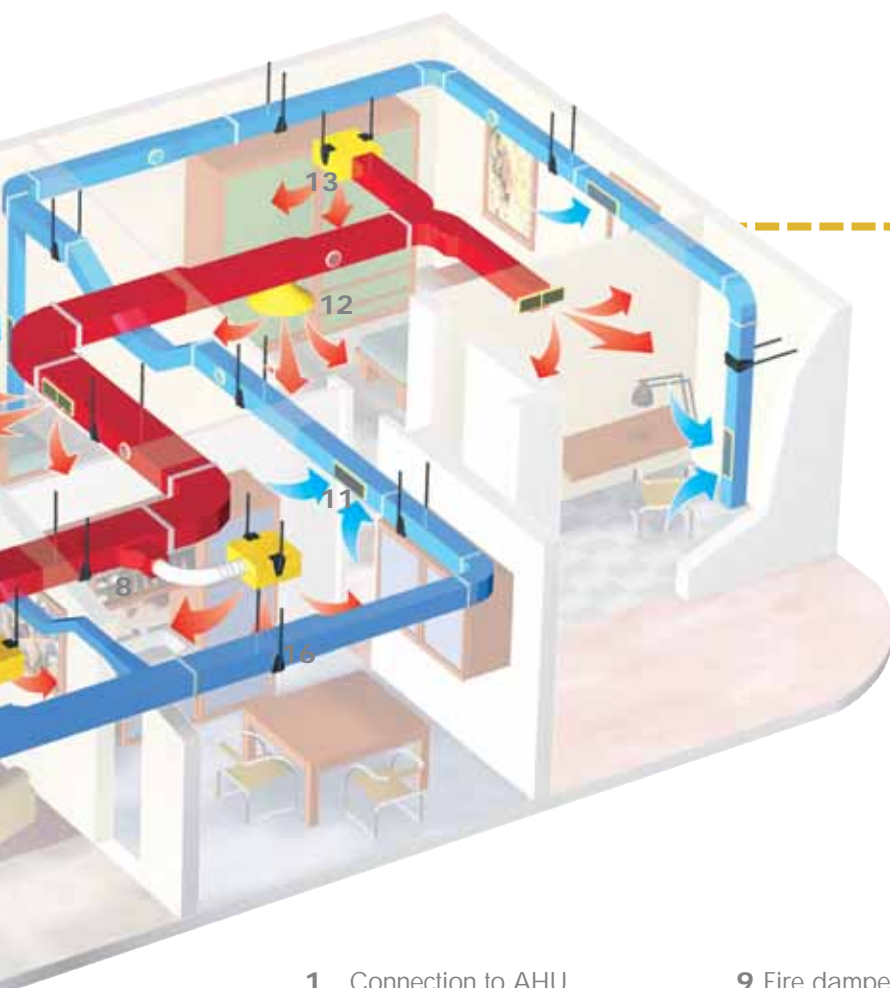

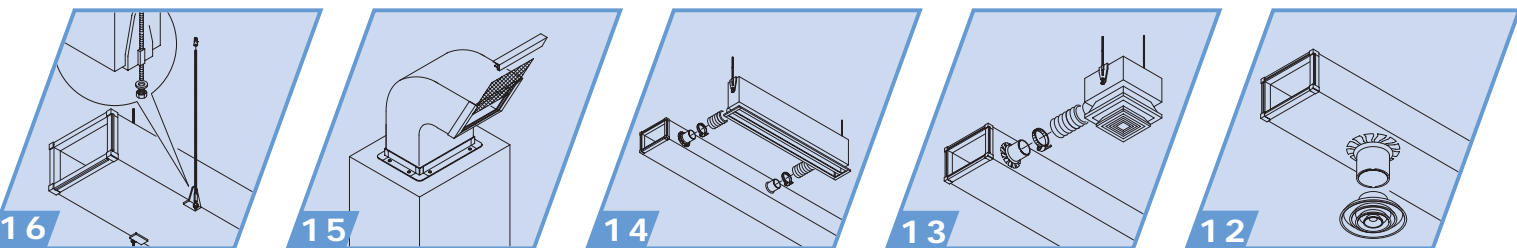

ALP System: pre-insulated ductwork from the Small to the Big installation

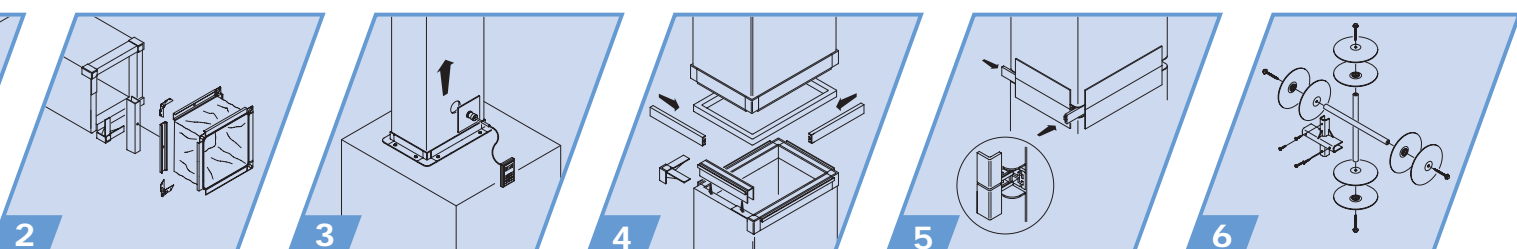

Being adaptable to any needs, ALP System pre-insulated HVAC ducts solve in a definitive way all the problems related to air duct installation and servicing. ALP System ducts are extremely light weight and offer top performance with energy savings of up to 85,23%, by keeping high safety, hygiene and fire resistance levels.

Any installation, be it big or small, can be carried out using ALP System, by benefiting thus of all the advantages that only such an ingenious system can offer.

National Bank of Abu Dhabi
Abu Dhabi - UAE

ALP System: the core is the panel

ALP panel is a sandwich constituted by a board of rigid polyurethane foam faced on both sides by an aluminium foil.

The high density foam, produced using top quality chemicals as well as CFC and HCFC free blowing agents, in line with the most recent environmental protection guidelines, is characterized by excellent stability and insulation properties.

The particular close-cell chemical structure of the foam does not allow any water absorption. Moreover, accelerated ageing tests carried out in laboratory have shown that after 25 years the insulation of ALP panel will be reduced of 6% only. This is a guarantee that ductwork fabricated using ALP panels can keep high performing levels for many years.

The aluminium foil, which has outstanding characteristics of corrosion resistance and durability, acts as a total barrier against vapour.

That used for ALP panels is characterized by different thicknesses and finishes to match any application requirements.

For some specific applications ALP has available an aluminium foil treated with a special "antimicrobial" compound that has proved to be effective against a wide range of bacteria, fungi and moulds.

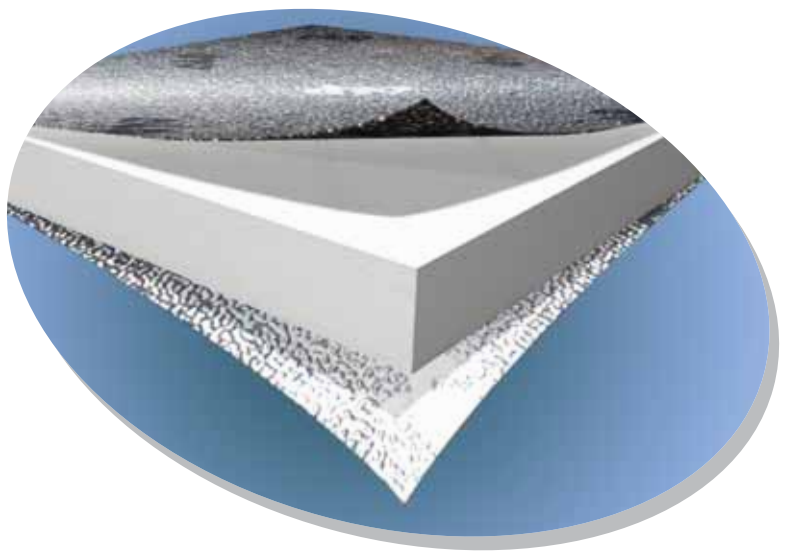

For some other applications, which require aggressive sanitising products, a Stainless Steel foil faces the panel.

Ducts fabricated with ALP panels do not need any additional cladding when installed outdoor because the insulation foam is already protected externally by the aluminium foil. Moreover, the epoxy coating on the aluminium foil itself makes them particularly resistant against UV rays and other weather agents.

The combination of the features of the foam with those of the aluminium foil makes the ALP panels particularly rigid. The panels stiffness has indeed a greater value than 350.000 Nmm and laboratory tests have shown that ducts fabricated with ALP panels are able to stand pressures of up to 5.000 Pascal.

The behaviour of insulation materials in case of fire is an important point to be considered for products to be used inside buildings. ALP, particularly concerned with safety, manufactures the foam of its panels by using only extremely effective flame retardant chemicals.

The many approvals and homologations that ALP panels have obtained are evidence of the fact that they comply with the requirements of Building Codes in many countries around the world.

The ALP panel: a rigid polyurethane foam board faced by aluminium / stainless steel foils

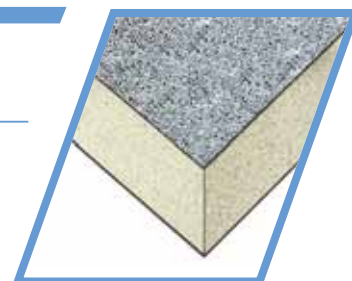

Pre-insulated ductwork for all applications: a system in compliance with the requirements of the major standards.

The fabrication of a duct that optimizes the performances of the installation and that assures duration and reliability during the time depends on the type of panel used. ALP has developed a wide range of panels differing for board thickness, facing foil and foil finish, in order to comply with any installation requirement.

Panel thickness:

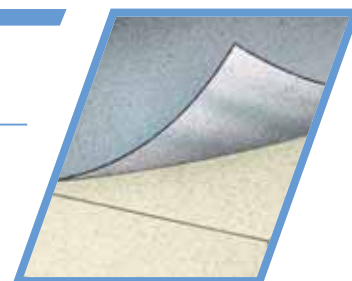

21 / 30 mm

Facing foil:

Aluminium - from 80 to 500 microns

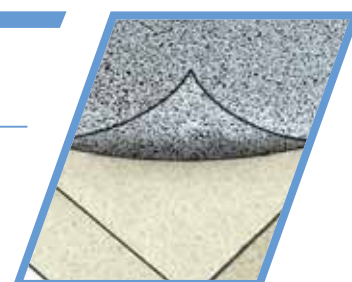

Stainless steel - 100 microns

Facing foil finish:

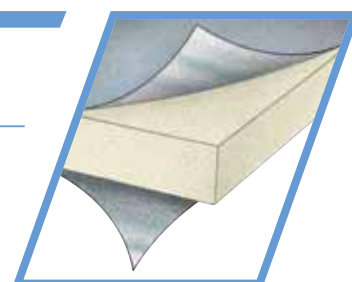

embossed / smooth

antimicrobial (smooth)

Foam density:

48 Kg/m³

The wide range of panels produced with high quality raw materials allows the fabrication of ducts with unique features of lightness, handiness, resistance and durability that comply with any project specifications. Indoor or outdoor, wherever air is distributed you will find ALP System with the quality and efficiency that distinguish it.

INDOOR

Panels 21 mm, 80 micron aluminium foil, suitable for standard and particular installations like swimming pools, cinemas, theatres, etc.

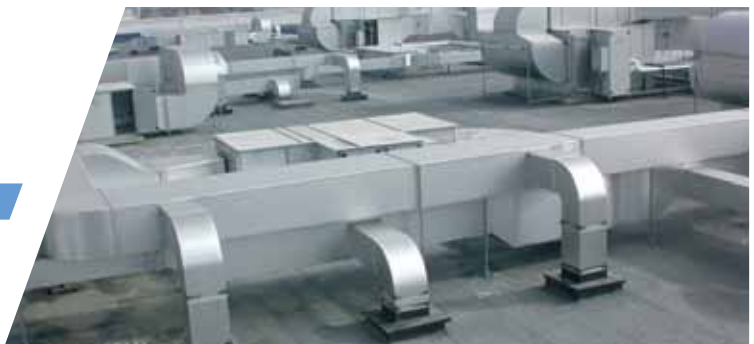

MACHINE ROOM

Panels 21 mm, 200 micron aluminium foil, with specific features of rigidity and strength, suitable for large section ductwork.

OUTDOOR

Panels 30 mm, 200 micron aluminium foil, with superior insulation characteristics and strength, for long lasting performances, even in severe weather conditions.

SPECIAL APPLICATIONS

Panels with ANTIMICROBIAL treatment, fit for hospitals, operation theatres, pharmaceutical and food industries.

Panels with STAINLESS STEEL foil fit for any application requiring aggressive sanitising products.

Panels - "Custom Made"

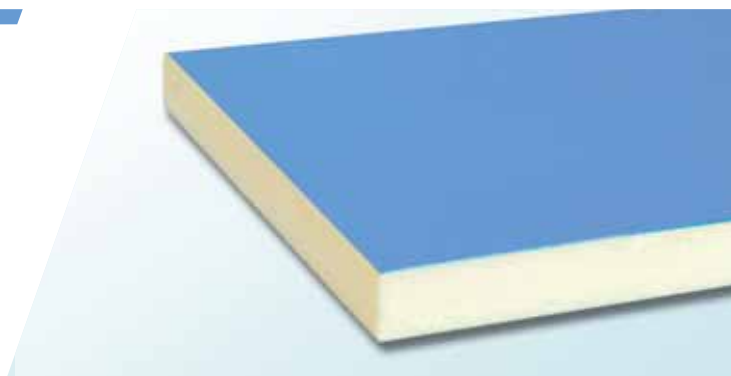

Technology and experience at customer's service

The experience developed during decades of activity and the capacity of its modern hi-tech production lines, combined with an extremely flexible attitude towards Customers, have made it possible for ALP to offer the market endless solutions.

By combining the variants of the components constituting its panels - facing type and thickness, foam density, overall dimensions, etc. - ALP is indeed nowadays able to produce personalized products meeting thus with any Customer's specific requirements.

The available variants are presently the following:

Panel thickness	from 21 up to 50 mm
Panel dimensions	length: from 1 up to 5 metres width: from 1 up to 1,230 m
Foam density	from 35 up to 60 kg/m ³
Facing	Aluminium foil from 0,08 up to 0,6 mm Stainless steel from 0,1 up to 0,6 mm Galvanised Iron from 0,3 up to 0,6 mm

Other production possibilities can be taken into consideration after discussion with our Technical Dept.

A Total Quality system

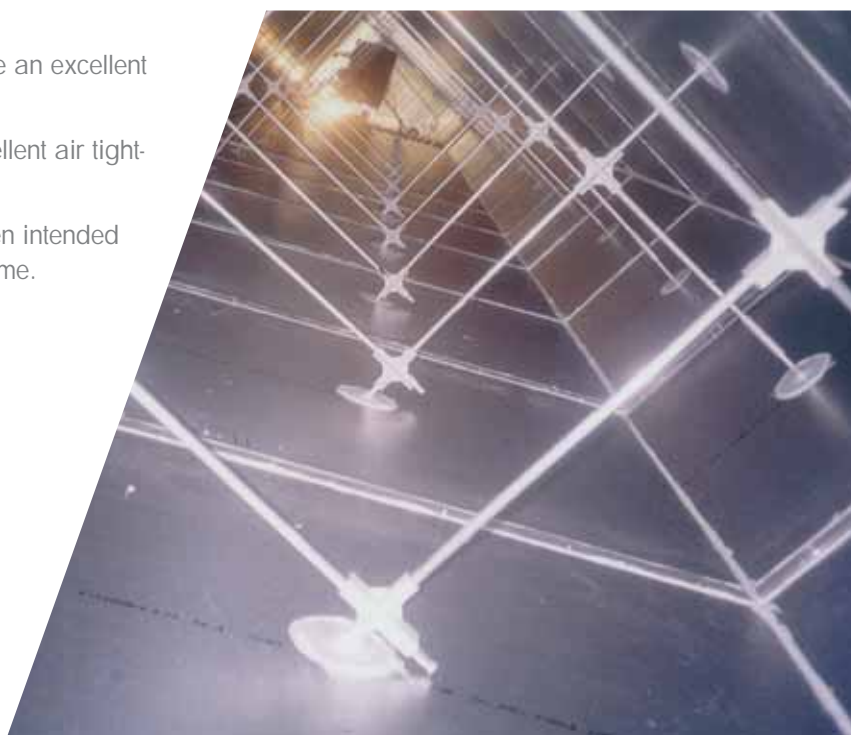

The ALP System quality does not only concern the panels but it extends also to the consumption materials, the profiles and the accessories that constitute the basic elements for the fabrication of a high efficiency ductwork.

In ALP System all products have been selected to grant the best of their performance:

- Glues and non-toxic sealants guarantee an excellent rigidity
- The patented joint systems assure excellent air tightness
- The wide range of accessories has been intended to reduce fabrication and installation time.

ALP System quality is witnessed by:

- Durability
- Better insulation
- Perfect fabrication and squaring
- Easy and safe installation

ALPactive®, the pre-insulated ANTIMICROBIAL ductwork

The real contribution to the prevention of air contamination

ALPactive represents a brilliant technological innovation for all milieus in which high hygiene levels are absolutely necessary to protect human health as well as industrial processes from the risk of unwanted contamination.

Recent studies have shown that most of the micro-organisms present in an ambient are conveyed by the air distribution systems. Lacking active means to prevent bacteria, fungi and moulds from growing to disruptive colonies, HVAC ducts have, up to the creation of ALPactive, been considered as a fertile culture ground for micro-organisms. ALPactive, that ALP has developed by combining all the properties of ALP System with those of an unprecedented antimicrobial technology, grants its end users all the advantages of high performing HVAC ducts and the qualitative control of air that only effective antimicrobials can assure.

The active principle lying behind ALPactive is a compound that exploits the antimicrobial action of a natural occurring element: silver. Through an industrial process, tested and patented by ALP, this compound is incorporated into the aluminium foil that faces the panels as well as into the external layer of all the accessories that complete the ALPactive System. In this way ALP has got to a whole in which ALPactive efficacy is granted by the continuity of the antimicrobial action inside the ductwork, on its sur-

face as well as on all the accessories in contact with the conveyed air.

Thanks to its features ALPactive has to be considered as a fixed reference point for critical applications such as Operation Theatres, Hospitals, Pharmaceutical and Food Industries.

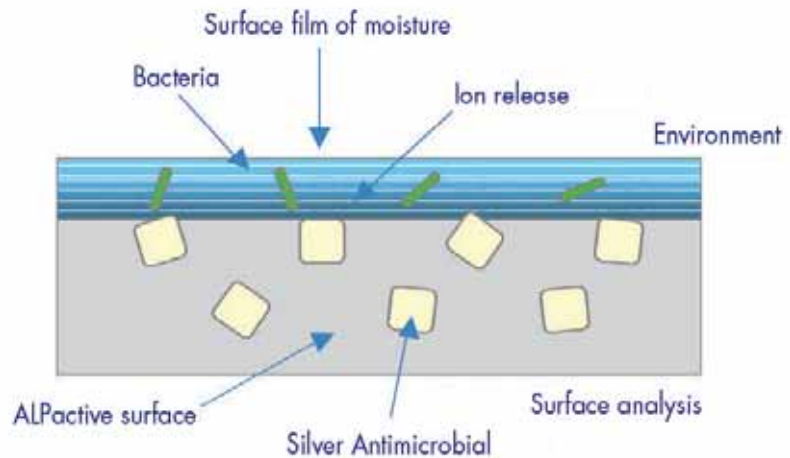

ALPactive has proved to be effective against a wide range of bacteria among which:

- Legionella pneumophila
- Staphylococcus aureus
- Pseudomonas aeruginosa
- Escherichia coli
- Candida albicans
- Aspergillus niger

It is also effective against the following viruses:

- SARS
- Norwalk Virus 5N1
- Avianflu Virus

ALPinox, the pre-insulated STAINLESS STEEL ductwork

The ideal solution for aggressive sanitizing procedures

The exclusive features of lightness, insulation and easiness of assembly that characterize ALP System can be found in ALPinox, a line that has been conceived and developed by ALP for the fabrication of pre-insulated ducts for all ambients with particular hygiene requirements.

Indeed the stainless steel panels, that constitute the core of ALPinox, satisfy the requirements of the norms regulating the installation of HVAC ducts in those fields in which maintenance has to be carried out by using aggressive sanitizing products.

In the optics of making the maintenance and disinfection procedures even easier, ALP has enriched ALPinox line with accessories intended for the fabrication of large inspection and access doors.

Fujairah - UAE

A general view of the basic equipment for the fabrication of ALP System ducts

ALP System: for everybody, everywhere.

To carry out the fabrication of an ALP System duct only few and simple tools, which do not require any electric power, are needed. This is definitely considered one of the major advantages of ALP System technology because, in case of projects that require a lot of measures modifications, it allows the fabrication of the ducts directly at site, assuring a rapid and more precise execution of the work.

BASIC EQUIPMENT

Code	Description	
601	Work table	n. 1
602/A	Multiblock rule - 4000 mm	n. 1
602/B	Multiblock rule - 1200 mm	n. 1
603/A	Aluminium square - 1200 mm	n. 1
603/B	Aluminium square - 700 mm	n. 1
604	Aluminium rule	n. 1
605	Compass - large	n. 1
606	Circular cutter	n. 1
607	Tool-kit case	n. 1
608	Bending machine - manual	n. 1
609	Gun for sealant	n. 1
610	Pneumatic glue spreader	n. 1

Equipment for manual production

Art. 601

Work table

Dimensions 4000 x 1200 mm
(n. 2 pcs - 2000 x 1200 mm each)

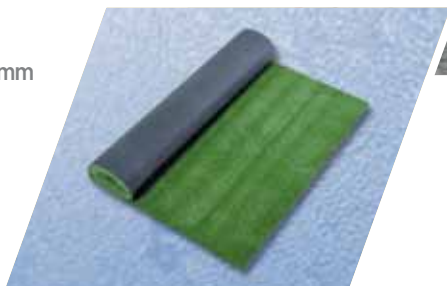

Complete with carpet
for easy cutting

SPARE PARTS:

Art. 801

Carpet for work table - 4000 x 1200 mm

Art. 602

Multiblock rule

Art. 602/A Length 4000 mm

Art. 602/B Length 1200 mm

Art. 603

Aluminium square

Art. 603/A Height 1200 mm

Art. 603/B Height 700 mm

Equipment for manual production

Art. 604

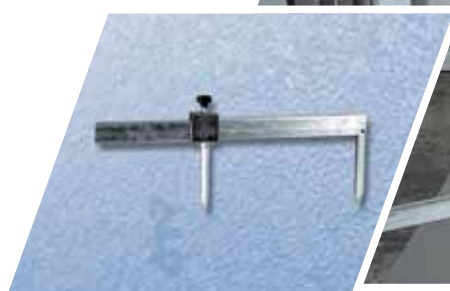

Aluminium rule

Dimensions 1300 x 40 x 20 mm

Art. 605

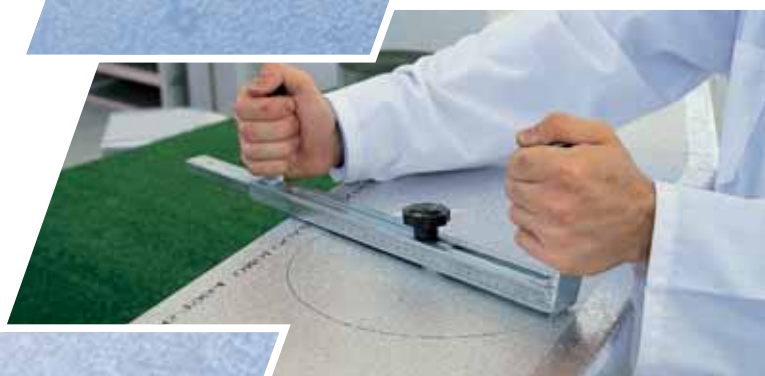

Compass - large

Art. 606

Circular cutter

Complete with n. 2 blades

SPARE PARTS:

Art. 807/B Blade for circular cutter

Equipment for manual production

Art. 607

Tool-kit case

complete with:

n. 1 double-blade cutter 45°

n. 1 single-blade cutter 90°

n. 1 single-blade cutter 45° Right

n. 1 single-blade cutter 45° Left

n. 2 manual glue spreaders

n. 2 tape markers

n. 1 hammer in nylon

n. 1 compass - small

n. 5 spatulas soft

n. 3 spatulas stiff

n. 1 file

n. 1 rivet gun

n. 1 gun for sealant

n. 1 groove plier

n. 1 goniometer

n. 2 cutters

n. 3 markers

n. 1 folding meter

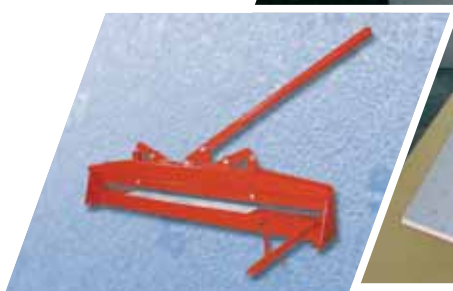

n. 1 tape measure

n. 3 hexagon keys

n. 8 spare blades

Art. 608

Bending machine - Manual

Equipment for manual production

Art. 609

Gun for sealant

Pneumatic gun length 2000 mm

SPARE PARTS:

Art. 808 Pneumatic gun for sealant tube

Art. 610

Pneumatic Glue spreader

complete with:

Brush

Gun

Flexible hose

SPARE PARTS:

Art. 803 Brush

Art. 804/A Gun with joint

Art. 805/A Flexible hose with joint

General view of the machineries developed by ALP

ALP System: Velocity and Professional Precision

For a systematic work organization ALP has developed professional equipment and machineries that grant an increase of the productivity keeping high quality execution levels.

PROFESSIONAL WORKSHOP – TYPICAL COMPOSITION

Code	Description	
651	Cutting machine for Straight ducts	n. 1
652/A	Bending machine - Width 2000 mm	n. 1
653	CNC Computer cutting machine	n. 1
655	Circular saw for Profiles - for Workshop	n. 1
656/A	HYDRO-GLUE spray unit - for Workshop	n. 1
657	Pneumatic pump for Sealant	n. 1

Equipment for automatic production

Art. 651

Cutting machine for straight ducts

complete with:

n. 3 double-blade cutters - double 45°

n. 1 single-blade cutter - 45° Right

n. 1 single-blade cutter - 45° Left

n. 1 single-blade cutter - 90°

n. 9 spare blades

OPTIONAL:

Art. 704 Set of n. 6 blade-holding blocks for stainless steel blades

Art. 807/C Stainless steel blade for art. 704

SPARE PARTS:

Art. 807/A Blade for Cutting machine

Art. 652

Bending machine

Art. 652/A width 2000 mm

Equipment for automatic production

Art. 653

CNC Cutting Machine

composed of:

n. 1 Cutting unit

n. 2 Roller tables

n. 1 Control pulpit

n. 1 Filter unit

n. 1 ALPwincut - Software for data input and automatic nesting

OPTIONAL:

Art. 833/A Milling cutter - Cone/Cylinder for stainless steel cut

Art. 833/B Milling cutter - Cylinder for stainless steel cut

Art. 833/C Spare blades for stainless steel cut set of n. 3 pcs

SPARE PARTS:

Art. 831/A Milling cutter - Cone/Cylinder

Art. 831/B Milling cutter - Cylinder

Art. 832 Milling cutter - Cone

Art. 834 Dust collection bag for Filter unit

Equipment for automatic production

Art. 654

Circular saw for profiles
- site use -

Art. 655

Circular saw for profiles
- workshop use -

SPARE PARTS:

Art. 809/A Blade for circular saw
Art. 654 - site use

Art. 809/B Blade for circular saw
Art. 655 - workshop use

Equipment for automatic production

Art. 656

HYDRO-GLUE Spray unit

Art. 656/A HYDRO-GLUE Spray unit
- workshop use -

complete with:

n. 1 gun and flexible hoses
connection for a second spray gun

Art. 656/B HYDRO-GLUE Spray unit
- site use -

complete with:

n. 1 gun and flexible hoses

SPARE PARTS:

Art. 861 Spray gun

Art. 862 Flexible hose

Note: Other Spare Parts are also available for the Spray gun and for the Units.

Equipment for automatic production

Art. 657

Pneumatic pump for Sealant

complete with:

n. 1 short gun and flexible hose
connection for a second gun

OPTIONAL:

Art. 872 Pneumatic gun
length 2 meters

Art. 873 Flexible hose with joints

SPARE PARTS:

Art. 871 Pneumatic gun - short

Art. 873 Flexible hose with joints

Tools

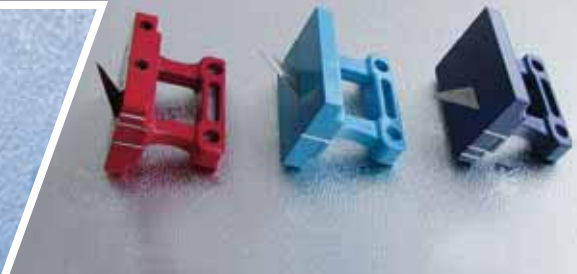

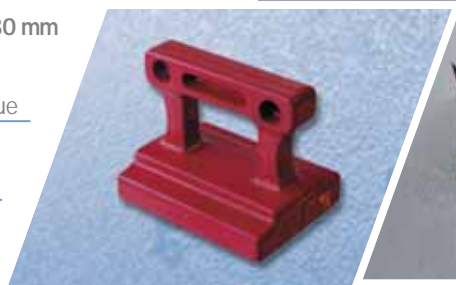

Art. 702

Single-blade Cutter for panels 21 and 30 mm
Blade not included

Art. 702/A 90° colour light blue

Art. 702/B 45° Right
colour dark blue

Art. 702/C 45° Left
colour red

SPARE PARTS:

Art. 806/F Blade

Art. 703

Double-blade Cutter for panels 21 and 30 mm

Art. 703/A double 45°

Complete with blades

SPARE PARTS:

Art. 806/F Blade

Art. 703

Double-blade Cutter for panels 21 and 30 mm

Art. 703/B double 22.5°

Complete with blades

SPARE PARTS:

Art. 806/F Blade

Double-blade Cutter for panel 30 mm only

Art. 703/C double 15°

Complete with blades

SPARE PARTS:

Art. 806/A Blade for panel
21 mm

Art. 806/F Blade for panel
30 mm

Tools

Art. 707

Manual Glue spreader

SPARE PARTS:

Art. 802 Brush for manual
glue spreader

Art. 708

Spatula - stiff

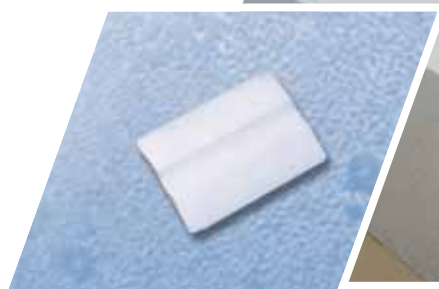

Art. 708/A in nylon

Art. 708/B in aluminium

Art. 709

Spatula - soft

Art. 710

Tape marker

Tools

Art. 711

Compass - small

Art. 712

Marker

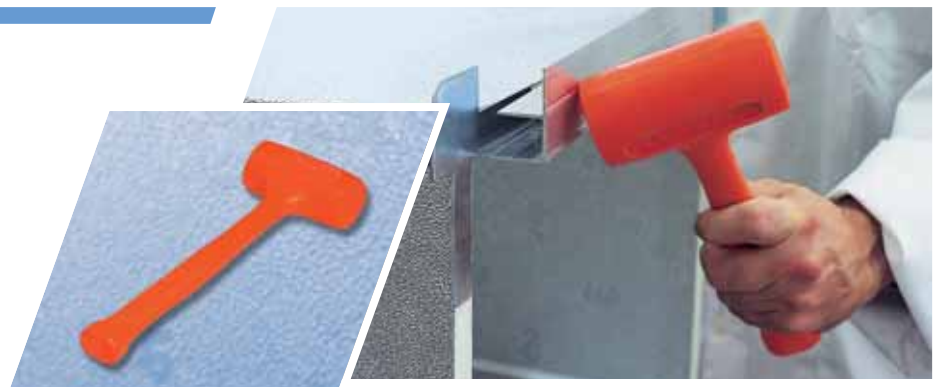

Art. 713

File

Art. 714

Hammer in nylon

Tools

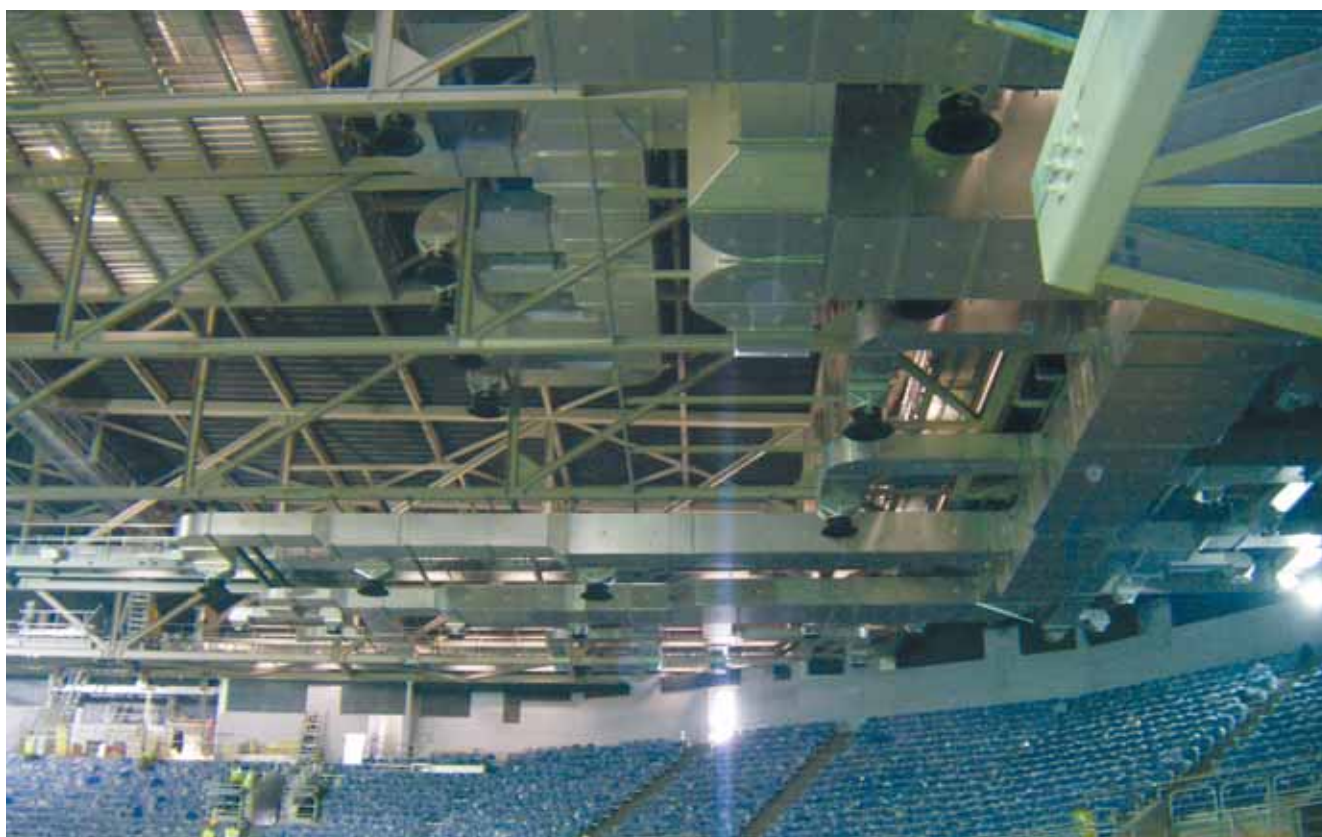

Art. 715

Cutter

Art. 716

Rivet gun

Packing

PACKING WITH POLYESTER FILM

Panels 21 mm with aluminium foil 80/80 microns

Quantity	n. 7 panels - 33,60 m ²
Dimensions	4000 x 1200 x 150 mm
Weight	50 kg

Panels 21 mm with aluminium foil 200/80 microns

Quantity	n. 5 panels - 24,00 m ²
Dimensions	4000 x 1200 x 110 mm
Weight	45 kg

Panels 30 mm with aluminium foil 200/80 microns

Quantity	n. 5 panels - 24,00 m ²
Dimensions	4000 x 1200 x 160 mm
Weight	55 kg

Shipment by truck

13,60 m Semi-Trailer

ALP shipments:
Example of a full load
on a 13,60 m long truck

Panels and accessories

Panels 21 mm and relevant accessories
